

eLearning Platform

Client Demo Script & Technical Cost Breakdown

Subscription-based eLearning platform for Filipino board exam reviewers. Built on React 19 + Vite, Supabase, Cloudflare Pages & R2, with PayMongo for GCash, Maya, and card payments.

0. Opening (~30 seconds)

SAY: "Sir/Ma'am, ipapakita ko po sa inyo ngayon ang working version ng platform. Subscription-based eLearning site po ito para sa Filipino board exam reviewers — parang Coursera or Udemy, pero specifically tailored para sa local market natin at GCash/Maya-friendly ang payments. Tatlong parte ang ipapakita ko: (1) ang experience ng student, (2) ang admin panel kung saan kayo mag-uupload ng content, at (3) ang payment flow end-to-end. Tapos sa dulo, breakdown ng monthly costs."

1. Public Site / Visitor Experience (~2 min)

DO: Pumunta sa / (Homepage)

SAY: "Eto po ang landing page. Una pong makikita ng visitor — value proposition, featured courses, at pricing. Ang pricing dito (PHP 299/month, may discount kapag 3 or 6 months) — fully configurable po ito, pwedeng baguhin anytime kahit hindi na ako."

DO: Click /courses

SAY: "Eto ang courses catalog. Pwede silang mag-browse kahit hindi naka-login. Pero pag pinindot nila ang isang lesson..."

DO: Click isang lesson (mag-redirect sa preview or login)

SAY: "...kapag hindi pa subscribed, ang video po 30 seconds preview lang, at ang PDF limited pages. Configurable din ito. Built-in 'try before you buy' ang dating."

DO: Click /books

SAY: "May bookstore din po — physical at digital books. Pwedeng i-order kahit hindi subscribed. Hiwalay na revenue stream."

2. User Registration + Subscription (~2 min)

DO: Pumunta sa /register

SAY: "Quick signup — email at password lang. Walang ipapadalang verification na complicated; gumagana agad."

DO: Pagkatapos: dashboard then /subscription

SAY: "Eto ang subscription page. Tatlong plans: 1 month, 3 months (10% off), 6 months (20% off). Pag pinili nila ang plan..."

DO: Click Subscribe (maa-redirect sa PayMongo hosted checkout)

SAY: "...dito po sila dadalhin sa PayMongo — secure payment gateway na suportado ang GCash, Maya, credit/debit cards. Hindi natin hawak ang card details — sila na bahala sa PCI compliance."

Demo tip: gamitin ang PayMongo test mode (test card 4343 4343 4343 4345).

SAY: "After successful payment, automatic na-extend ang subscription nila. May carryover logic pa — kung may 2 weeks pa silang natitira tapos nag-renew sila ng 1 month, magiging 1 month + 2 weeks ang bago nilang expiry. Hindi sila malulugi."

3. Student Experience (~3 min)

DO: Pumunta sa /dashboard

SAY: "Pagka-subscribed na, eto ang dashboard nila — progress tracker, saved courses, recent quizzes, at stats."

DO: Click isang lesson

SAY: "Full video access na po, full PDF access. Habang nanonood, automatic tinatrack ang progress — bookmark resume kung saan sila huminto."

DO: Scroll to quiz section sa lesson

SAY: "Sa dulo ng lesson, may auto-scored quiz. Magkakaroon sila ng results, makikita ang mali, at maa-add sa kanilang quiz history."

DO: Click /profile/devices

SAY: "May device management din po — kung sino-sino ang naka-login sa account nila. Kaya hindi pwedeng share-share ng account ng walang limit. Anti-piracy mechanism ito."

4. Admin Panel (~3 min)

DO: Pumunta sa /admin (maa-login bilang admin)

SAY: "Eto na po ang admin panel — dito kayo mag-mamanage ng buong content at users without touching code."

I-walkthrough ang sidebar:

- /admin/courses — Create, edit, publish ng courses.
- /admin/lessons — Upload ng videos at PDFs. Direktang papunta sa Cloudflare R2 storage.
- /admin/quizzes — Add/edit ng quiz questions per lesson.
- /admin/categories — Organize ng courses by review type (Nursing, CPA, Engineering Board).
- /admin/users — Tignan ang lahat ng users, manual subscription extension kung kailangan.

- /admin/subscriptions — Lahat ng active/expired subs, kita per month.
- /admin/books — Manage ng bookstore inventory.
- /admin/orders — Track ng book orders at fulfillment status.
- Dashboard stats — Lesson completion rates, total active subscribers, revenue snapshot.

SAY: "Lahat po ito, gawa sa pag-iisip na hindi techie ang gagamit. May forms, dropdowns, drag-and-drop — kaya ng kahit sinong staff niyo."

5. Security at Reliability (~1 min)

SAY: "Bago ko po tapusin, importante itong mga ito:"

- **Video at PDF security:** hindi pwedeng i-download ng users kahit i-inspect nila ang browser. Signed URLs lang na expired after 60 seconds.
- **Database-level access control:** kahit may magaling na hacker, walang makukuha kung hindi subscribed.
- **Daily backups:** kahit anong mangyari sa server, recoverable po ang data.
- **99.9% uptime:** hosted sa Cloudflare — same infrastructure ng malalaking websites globally.

6. Closing — Pricing Summary (~30 sec)

SAY: "Para sa subscribers niyo: PHP 299/month, PHP 807 for 3 months (10% off), at PHP 1,435 for 6 months (20% off). Pwede pa rin po itong baguhin anytime depende sa market test ninyo."

Technical Costs Breakdown

Estimated infrastructure costs the client will need to cover.

Monthly Recurring Costs

Service	Purpose	Free Tier?	Est. Cost (PHP/mo)
Cloudflare Pages	Website hosting (frontend)	YES (unlimited bandwidth)	0
Supabase (Free)	Database + Auth + Edge Functions	YES (500MB DB, 50K MAU)	0 (early stage)
Supabase (Pro)	Same as above, scaled	\$25/mo when you outgrow free	~1,400 (when scaled)
Cloudflare R2	Video + PDF storage	10 GB free, \$0.015/GB after	85 - 500
PayMongo	Payment processing	No monthly fee	0 fixed (txn fees apply)
Domain (.com / .ph)	Website address	Annual: PHP 600-1,500/yr	~100 (equivalent)
Email service	Transactional emails (optional)	Resend 3K/mo free	0 initially

Realistic Monthly Cost Ranges

Early stage (first 6-12 months): PHP 100 - 600/month (domain + small storage). Most services free pa.

Scaled (1,000+ active subscribers, ~500GB content): PHP 2,500 - 4,000/month (Supabase Pro + R2 storage + domain).

One-Time Costs

Item	Cost (PHP)
Domain registration (1st year)	600 - 1,500
PayMongo merchant onboarding	0 (free)
SSL certificate	0 (auto-provisioned by Cloudflare)

Transaction Fees (per payment)

Method	Fee
Credit / Debit Card	2.5% + PHP 15
GCash	2.5%

Method	Fee
Maya	2.5%
Bank transfer (InstaPay)	Flat ~PHP 10 - 15

Example: Sa PHP 299 subscription via GCash, PayMongo kukunin ~PHP 7.50, client receives ~PHP 291.50.

Talking Points sa Client

- **Walang upfront hosting cost.** Ang Cloudflare + Supabase free tiers, kayang-kaya ng first few hundred users.
- **Pay-as-you-grow.** Magbabayad lang sila ng mas malaki kapag may revenue na talaga.
- **No vendor lock-in sa payments.** PayMongo lang, pero pwedeng palitan ng Xendit or PayPal in the future.
- **Walang server administration.** Walang DevOps cost, walang sysadmin salary — managed services lahat.

Prepared for client demo - eLearning Review Platform - Subject to revision based on final feature scope.
